exclusive reporting on the regulation and control of greenhouse gases

## About

### About Carbon Control News

---

Posted: October 7, 2009

---

*Carbon Control News* is the newest member of the Inside EPA family of news services, providing exclusive coverage on the evolving debate over climate change controls. In the same tradition that has made Inside EPA Weekly Report must-reading for environmental policy professionals, *Carbon Control News* provides singular focus on the biggest environmental issue in decades. **And make no mistake: climate control regulation is coming – and coming soon.**

EPA and other federal agencies are moving forward with regulations and policies to limit greenhouse gas emissions, as Congress continues to struggle with passage of a national climate change program. *Carbon Control News* provides the inside scoop on these emerging policies by tracking the key developments among all the major players – the Obama administration, Congress, states and regional programs such as the Northeast Regional Greenhouse Gas Initiative (RGGI) and the Western Climate Initiative; and international negotiators who are shaping domestic climate change policies in the United States and in other countries 

**The certainty is that there will be climate change controls** -- the uncertainty involves the scope of the controls, the extent of regulations, and the allocation of state and federal responsibilities. *Carbon Control News* is your best bet to satisfy your growing and inescapable need for news on this changing climate debate.

Inside EPA's *Carbon Control News* will deliver in three ways:

- A comprehensive online news service, providing exclusive stories (in the Inside EPA tradition), breaking daily news, hot documents (including draft bills and regulatory proposals), featured articles and other special reports. (Our blog, In the Air, supplements our hot news coverage, giving you more of the buzz and behind-the-scenes intrigue.)
- A weekly newsletter, delivered right to your desk by mail and in an easy-to-download PDF format, providing additional context and perspective on the most important developments.
- Breaking news and daily updates by e-mail, so you'll never miss a major story.

### Subscription Costs

A one-year subscription to *Carbon Control News* – providing 24/7 online access, the weekly newsletter, and time-sensitive e-mail alerts when the news warrants – costs \$995 for a single reader. Expanded access and site licenses are also available. *Current subscribers to any Inside EPA product get a special \$200 discount.*

**Sign up for a free two-week trial.**
